Period fo	The MAILING DATE of this communication app or Reply	pears on the cover sheet with the o	correspondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

Page 2

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-63 and 68-90, drawn to subject matter wherein a channel is assigned based on the density of the communication traffic, classified in class 455, subclass 453.
 - II. Claims 64-67, drawn to subject matter having detail of a technique for regulating the intensity of signals transmitted between stations, classified in class 455, subclass 522.
- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct, each from the other because of the following reasons: invention I has utility about subject matter wherein a channel is assigned based on the density of the communication traffic, while invention II has separately utility about subject matter having detail of a technique for regulating the intensity of signals transmitted between stations.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different subclasses, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/913,457

Art Unit: 2687

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Huy Q Phan whose telephone number is 703-305-9007.

The examiner can normally be reached on 8AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Kincaid G. Lester can be reached on 703-306-3016. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
